📁 PROJECTS

BestBuy 🌐

09/2022 – 11/2022

Technology : HTML5 | CSS3 | REACT | REDUX | NODE | EXPRESS | MONGODB | STRIPE

- BestBuy is a Website based on the MERN stack that deals with buying and selling Products. BestBuy front end is implemented with ReactJS using Tailwind CSS along with Redux for state management.
- It also uses Axios to interact with the backend to send and receive data. BestBuy's backend is built using NodeJS and ExpressJs. It provides API to handle user login and registration as well as creating, deleting, and updating products and users.
- It also interacts with the MongoDB database to save user and product data. Stripe is used as a payment gateway. Cloudinary is used for storing user and product images. Bcrypt Use to Password Hashing. Along with the ADMIN PANEL using which the admin can manage users and Products.
- JWT (JSON Web Tokens) for user authentication.
- Demo- <https://dull-erin-viper-hem.cyclic.app/> 🌐
- Source code- <https://github.com/amit5511/Bestbuy> 🌐
- Documentation- <https://drive.google.com/file/d/1GPsv5DSDrZhCerX7dWOhQf0PcNmVgrE/view> 🌐

🎓 EDUCATION

Bachelor of Engineering Computer Science (B.Tech CSE)

08/2020 – 06/2024 | Meerut, IN

Chaudhary Charan Singh University 🌐

8.16 CGPA

Inter Mediate

04/2018 – 02/2020 | Basti, IN

Central Academy Senior Secondary School

81%

🧠 SKILLS
